

**Precision Peptides
for Scientific Advancement**

ReGen
PEPT

RegenPept is a global biotechnology company dedicated to the **research, development, and production of high-purity peptides** for scientific and laboratory applications.

Each product is developed using advanced synthesis methodologies and undergoes strict analytical verification, ensuring **consistency, purity, and reliability.**

RUO Research Use Only

RegenPept integrates advanced peptide synthesis technologies, rigorous quality control systems, and continuous investment in **research and innovation**.

Our mission is to support scientific advancement through **precision-engineered peptides**, developed under strict analytical standards and tailored to the evolving needs of research institutions worldwide.

Research & Technology

Scientific innovation is the foundation of RegenPept.

Our Research & Technology platform combines:

- Advanced solid-phase peptide synthesis
- State-of-the-art analytical techniques
- Continuous process optimization

We invest heavily in R&D to develop novel peptides, improve synthesis efficiency, and support custom peptide design for specialized research applications.

Quality & Compliance

Quality and compliance are central to every RegenPept operation.

All peptides are produced in controlled laboratory environments and validated through analytical methods such as:

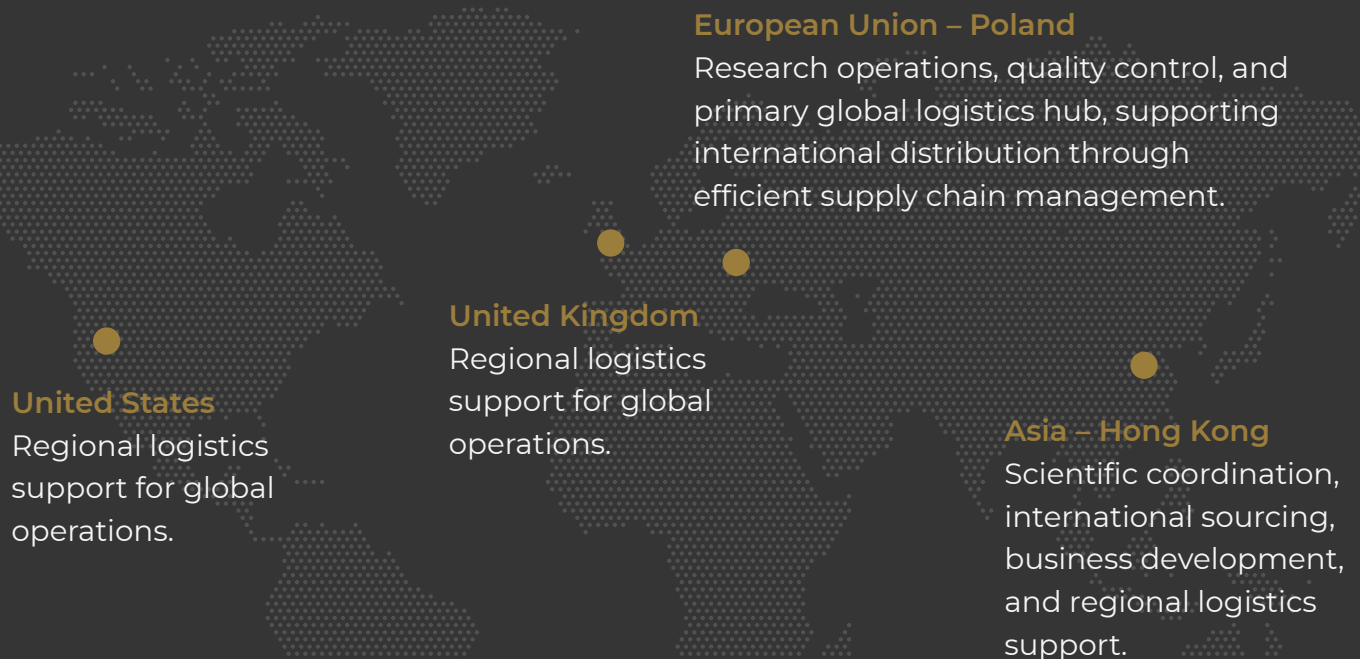

- High-Performance Liquid Chromatography (HPLC)
- Mass Spectrometry

Each batch is supported by complete documentation and a **Certificate of Analysis**, ensuring traceability, reproducibility, and compliance with international standards.

Global Presence & Logistics

RegenPept operates globally with strategic facilities across Europe, Asia, and North America.

This global structure enables reliable worldwide delivery and responsive support for research institutions.

Founded on principles of scientific excellence and technological innovation, RegenPept is committed to advancing peptide science.

Our multidisciplinary team combines **expertise in chemistry, biotechnology, and analytical science** to deliver reliable, high-performance peptide solutions to the global research community.
