

AESTHETIC INJECTABLES

Clinical Product Portfolio

Dermal fillers • skin-quality injectables • collagen biostimulators • polynucleotides • body-contouring injectables

Professional reference brochure
Prepared from the supplied Dubai product list and expanded with manufacturer-level clinical/product information.
Commercial pricing has been intentionally excluded.

PORTFOLIO SCOPE

40 products across seven manufacturer/brand groups. The portfolio includes conventional hyaluronic-acid fillers, specialized lip and structural fillers, intradermal skin-quality injectables, PLLA and CaHA biostimulatory technologies, polynucleotide skin boosters and a localized adipocytolytic/body-contouring injectable.

IMPORTANT PROFESSIONAL NOTICE

For healthcare-professional and B2B product-catalog purposes only. Product indications, formulations, device classification, pack configurations and availability vary by jurisdiction and product version. This brochure is not an Instructions for Use document and must not be used as a substitute for the manufacturer IFU, local regulatory labeling, formal training, patient assessment or clinical judgment. Injectable aesthetic procedures may involve serious adverse events, including vascular complications.

Clinical classification at a glance

The supplier spreadsheet is a commercial product list and does not provide clinical specifications. The classifications below therefore combine the products named in that list with current manufacturer information. No prices are reproduced.

Technology / category	Representative products	Clinical role
Crosslinked HA fillers	JUVÉDERM, TEOSYAL RHA, Restylane, BELOTERO, Neauvia Intense	Soft-tissue correction, contouring, lip enhancement and/or volumization depending on product IFU.
Skin-quality HA injectables	SKINVIVE, Redensity 1, Restylane Vital, BELOTERO Revive, Hydro Deluxe	Hydration, texture, elasticity and skin-quality protocols; generally less focused on structural volume.
PLLA biostimulator	Sculptra	Gradual collagen stimulation and structural restoration.
CaHA filler / biostimulator	RADIESSE	Immediate correction with CaHA microsphere-mediated regenerative biostimulation.
Hybrid HA + CaHA	Neauvia Stimulate	Filling plus CaHA-enriched bioregenerative positioning.
Polynucleotides	PhilArt Eye, PhilArt, PhilArt Next	Skin-quality biostimulation; not conventional volumizing fillers.
Adipocytolytic injectable	AQUALYX Cosmetic	Localized body contouring; not a dermal filler.

Clinical selection principle

These technologies are not interchangeable. Product selection should be driven by the treatment objective, tissue plane, rheologic/biologic properties, anatomy, patient factors, local authorization and the applicable IFU. Brand-level descriptions below are deliberately clinical and non-promotional.

JUVÉDERM

Manufacturer / company: Allergan Aesthetics, an AbbVie company

Hyaluronic-acid injectable portfolio spanning wrinkle correction, lip/perioral treatment, structural volumization and intradermal skin-quality applications.

PRODUCT	CLASS / PLATFORM	CLINICAL POSITIONING / PROPERTIES
JUVÉDERM Ultra 2	HA dermal filler	Superficial-to-moderate correction; fine lines and subtle contour refinement.
JUVÉDERM Ultra 3	HA dermal filler	Moderate facial lines and folds; versatile soft-tissue correction.
JUVÉDERM Ultra 4	HA dermal filler	Deeper folds and more substantial soft-tissue augmentation.
JUVÉDERM VOLUMA	HA volumizing filler	Deep structural volumization and contour support, particularly mid-face/chin/temple depending on local IFU.
JUVÉDERM VOLBELLA	HA dermal filler	Lip augmentation, perioral refinement and selected infraorbital correction depending on market authorization.
JUVÉDERM VOLIFT	HA dermal filler	Dynamic facial lines/folds and contour correction; designed for tissue integration with mobility.
SKINVIVE by JUVÉDERM	Intradermal HA injectable / skin quality	Microdroplet HA treatment focused on skin smoothness and hydration; not positioned as a conventional volumizing filler.

Platform note

The JUVÉDERM family is based on injectable hyaluronic-acid gels. Current Allergan Aesthetics materials distinguish structural/volumizing products from intradermal SKINVIVE, which is positioned around skin smoothness and hydration rather than conventional volumization.

TEOXANE / TEOSYAL

Manufacturer / company: Teoxane Laboratories

Swiss-developed HA portfolio including resilient hyaluronic acid (RHA) fillers for dynamic facial areas, deep volumizers and skin-quality formulations.

PRODUCT	CLASS / PLATFORM	CLINICAL POSITIONING / PROPERTIES
TEOSYAL RHA 1	Resilient HA filler	Fine superficial dynamic lines; low-depth correction.
TEOSYAL RHA 2	Resilient HA filler	Mild-to-moderate facial wrinkles and creases.
TEOSYAL RHA 3	Resilient HA filler	Deeper dynamic facial wrinkles and folds.
TEOSYAL RHA 4	Resilient HA volumizer	Deep wrinkles/folds and volumization in mobile facial areas.
TEOSYAL RHA KISS	Resilient HA lip filler	Subtle lip volume, contour and dynamic perioral correction.
TEOSYAL PureSense Redensity 1	HA skin booster	Skin-quality protocol focused on redensification, hydration and oxidative-stress protection.
TEOSYAL PureSense Redensity 2	HA dermal filler	Specialized HA formulation used for delicate periocular correction according to local IFU.
TEOSYAL PureSense Ultra Deep	Deep HA volumizer	Projection, facial contour remodeling and restoration of deep volume.
TEOSYAL PureSense Kiss	HA lip filler	Lip volume and contouring with a high-cohesivity HA gel.

Platform note

TEOSYAL RHA products are designed around resilient HA behavior in dynamic facial areas. PureSense products in this list include a deep volumizer, a lip filler and Redensity formulations for skin-quality or delicate-area applications.

GALDERMA

Manufacturer / company: Galderma

Aesthetic injectable portfolio combining Restylane HA technologies with Sculptra poly-L-lactic acid collagen biostimulation.

PRODUCT	CLASS / PLATFORM	CLINICAL POSITIONING / PROPERTIES
Sculptra	PLLA collagen biostimulator	Poly-L-lactic acid injectable designed for gradual collagen stimulation and structural restoration.
Restylane Lidocaine	HA dermal filler	HA filler for facial wrinkles/folds and selected lip indications depending on local IFU.
Restylane Kysse	HA lip filler	Lip augmentation and perioral line correction with an emphasis on natural movement.
Restylane Volyme	HA volumizing filler	Restoration of facial volume and contour.
Restylane Lyft	HA structural filler	Deep structural support, cheek augmentation and selected hand-volume indications depending on market.
Restylane Defyne	HA dermal filler	Moderate-to-severe deep facial folds; selected chin augmentation indications in some markets.
Restylane Refyne	HA dermal filler	Moderate-to-severe facial lines/folds with dynamic tissue integration.
Restylane Vital SB	HA skin booster	Skin-quality injectable aimed at hydration, elasticity and fine-texture improvement.

Platform note

Restylane is an HA filler family using Galderma HA technologies, while Sculptra is chemically distinct: a poly-L-lactic acid injectable that acts through gradual collagen biostimulation rather than immediate HA gel replacement alone.

MERZ AESTHETICS

Manufacturer / company: Merz Aesthetics

Portfolio combining BELOTERO biomimetic HA gels with RADIESSE calcium hydroxylapatite technology for correction, volumization and regenerative biostimulation.

PRODUCT	CLASS / PLATFORM	CLINICAL POSITIONING / PROPERTIES
RADIESSE (without lidocaine)	CaHA injectable filler / biostimulator	Calcium hydroxylapatite microspheres in gel carrier; immediate correction plus regenerative biostimulatory activity.
BELOTERO Lips Shape	HA lip filler	Lip body/shape enhancement within the BELOTERO lip portfolio.
BELOTERO Balance	HA dermal filler	Versatile correction of lines and wrinkles, including perioral and selected periocular areas.
BELOTERO Lips Contour	HA lip filler	Lip-border definition and contour refinement.
BELOTERO Intense	HA dermal filler	Correction of deeper folds and volume enhancement where higher support is required.
BELOTERO Revive	HA + glycerol skin-quality injectable	Biomimetic HA with glycerol for hydration, texture, firmness, elasticity and tone.
BELOTERO Soft	HA dermal filler	Smooth HA gel intended for fine superficial lines and delicate skin areas.
BELOTERO Volume	HA volumizing filler	Facial volume restoration and contour definition, including cheek volumization.

Platform note

BELOTERO comprises biomimetic HA gels with products differentiated by tissue behavior and clinical objective. RADIESSE is not an HA filler: it contains calcium hydroxylapatite microspheres suspended in a gel carrier and has both corrective and biostimulatory properties.

NEAUVIA

Manufacturer / company: MATEX LAB S.p.A. / Neauvia

Italian-manufactured Class III aesthetic injectables using PEG-crosslinked HA technology and selected CaHA-enriched hybrid hydrogels.

PRODUCT	CLASS / PLATFORM	CLINICAL POSITIONING / PROPERTIES
Neauvia Intense	PEG-crosslinked HA filler	High injection-profile dermal filler for volumetric correction; PEG-based crosslinking platform.
Neauvia Intense Lips	PEG-crosslinked HA lip filler	Lip-focused HA filler for contour and volume.
Neauvia Stimulate	Hybrid HA + CaHA injectable	PEG-HA hydrogel enriched with CaHA, glycine and L-proline; combines filling and bioregenerative positioning.
Neauvia Hydro Deluxe	Non-crosslinked HA + CaHA hydrogel	Skin-quality hydrogel containing HA, CaHA, glycine and L-proline; positioned for superficial face/neck protocols.

Platform note

Neauvia states that Intense, Intense Lips, Stimulate and Hydro Deluxe are Class III medical devices under EU MDR. The portfolio uses PEG-based HA technology; Stimulate and Hydro Deluxe incorporate CaHA, with different crosslinking and injection profiles.

AQUALYX / MARLLOR BIOMEDICAL

Manufacturer / company: Marllor Biomedical

Italian aesthetic-medicine platform represented here by AQUALYX Cosmetic, a deoxycholate-family injectable for localized body contouring rather than facial filling.

PRODUCT	CLASS / PLATFORM	CLINICAL POSITIONING / PROPERTIES
AQUALYX Cosmetic	Adipocytolytic / body-contouring injectable	Deoxycholate-family injectable solution positioned for localized non-surgical body contouring; not a dermal filler.

Category distinction

AQUALYX Cosmetic should be kept outside the dermal-filler category in Atlas/catalog taxonomy. Marllor describes it as a deoxycholate-family injectable for localized body contouring.

CROMA PHARMA / PHILART

Manufacturer / company: Croma-Pharma GmbH

Polynucleotide-based injectable skin boosters designed to improve skin quality without conventional volumetric filling.

PRODUCT	CLASS / PLATFORM	CLINICAL POSITIONING / PROPERTIES
Croma PhilArt Eye	Polynucleotide skin booster	PN-based biostimulatory injectable tailored to delicate periocular skin-quality protocols.
Croma PhilArt	Polynucleotide skin booster	Long-chain PN injectable supporting hydration, fibroblast environment, elasticity and skin quality.
Croma PhilArt Next	PN + HA skin booster	Combined polynucleotide and HA platform for mature/dehydrated skin, hydration and biostimulatory skin-quality support.

Platform note

PhilArt products are polynucleotide-based skin boosters/biostimulatory injectables. Croma emphasizes that polynucleotides improve skin quality without the volumizing or structural remodeling role of conventional dermal fillers. PhilArt Next combines PN with hyaluronic acid.

Professional safety & regulatory framework

Aesthetic injectables should be supplied and administered only in accordance with applicable national regulation, the exact product IFU and professional scope-of-practice requirements. The product list supplied for this brochure does not establish UAE registration status, prescription status, pack configuration, batch release status or authorized indications. Those elements should be verified for each SKU before commercial or clinical use.

Core clinical controls

- Confirm exact SKU, concentration, presentation, lot, expiry, storage conditions and IFU before use.
- Use only appropriately trained healthcare professionals with detailed knowledge of facial/body anatomy and injection-related complications.
- Perform patient-specific assessment including medical history, prior procedures, allergies, infection/inflammation, relevant medication and treatment objectives.
- Maintain product traceability and adverse-event / vigilance procedures appropriate to the jurisdiction.
- Do not extrapolate an indication, injection plane or technique from another product in the same brand family.

Source framework

SOURCE	USE IN THIS BROCHURE
Allergan Aesthetics / AbbVie	JUVÉDERM and SKINVIVE portfolio information; 2026 safety/indication communications.
Teoxane Laboratories	TEOSYAL RHA / PureSense healthcare-professional product and IFU information.
Galderma	Restylane and Sculptra official product information.
Merz Aesthetics	BELOTERO official product portfolio and RADIESSE Instructions for Use / professional resources.
Neauvia / MATEX LAB	Official Intense, Stimulate and Hydro Deluxe product information; EU MDR device statements.
Croma-Pharma	Official polynucleotide/PhilArt portfolio information and clinical positioning.
Marllor Biomedical	Official AQUALYX Cosmetic product and company information.
Supplier source list	PRICE LIST DUBAI.xlsx - used only to define the products included in this portfolio; commercial prices intentionally omitted.

Prepared 25 September 2026. Product nomenclature was normalized where the supplied spreadsheet contained obvious spelling variants (for example Sculptra, BELOTERO and Lips Contour), while preserving the portfolio scope. No commercial prices are shown.
