tellmeGen™

Name: Walid Soaida
Date: 10-05-2026

Name	Results
Antioxidant capacity (GPX1 and CAT genes)	Average levels
Apolipoprotein A1 levels	Average levels
Apolipoprotein B levels	High levels
Bitter taste perception	Ability to perceive bitter taste
Blood glucose	High levels
Body fat percentage	Low percentage
Body mass index	High body mass index
Bone mineral density	Low density
Caffeine and anxiety	Average levels of caffeine cravings
Caffeine and sports performance	Normal performance
Caffeine dependence after prolonged consumption	Low caffeine dependence
Calcium levels	High levels
Celiac disease predisposition	Absence of predisposition
Creatinine levels	Average levels
Diastolic blood pressure levels	Low levels
Exercise-induced muscle damage (initial phase)	Medium risk
Exercise-induced muscle damage (regeneration capacity)	Usual capacity
Exercise-induced muscle damage (second phase)	Low risk
Farmer-hunter profile	Farmer profile
Food intake control	Slight tendency to overeat
Galectin-3 levels	Low levels
Genetic predisposition to peanut allergy	Slight predisposition to increase
Glycated hemoglobin levels	High levels
HDL cholesterol levels	Low levels
Histamine intolerance	Average levels
Intraocular pressure	Low levels
Lactose intolerance	High probability of being intolerant
LDL cholesterol levels	High levels
Levels of vitamin A (beta carotene)	Average levels

Long-chain omega fatty acids levels	Low levels
Lung function (exhaled air volume)	Increased exhaled air volume
Muscle endurance	Higher probability of being a sprinter
Myoadenylate deaminase (AMPD1 gene)	You do not have the C34T variant in the AMPD1 gene.
Prediction of visceral adipose tissue	High adipose tissue volume
Preference for sweets	Average probability
Serum phosphate levels	Low levels
Systolic blood pressure levels	High levels
Tendinopathies in lower extremities (legs)	High risk
Tendinopathies in upper extremities (arms)	High risk
Urate levels	Low levels
Vitamin B12 levels	Average levels
Vitamin C levels	Average levels
Vitamin D levels	Average levels
Vitamin E levels	Slightly high levels
